Participant Feedback	IAS Response
One comment is some questions can be more clear, which instructor noted during the discussion. Also, some questions can be made more direct, as some participants might not be from that industry. Overall, I enjoyed the math and computations. Good work put by the instructor.	Good comment. Understand that we have to allow for the different backgrounds and experience of participants to ensure we do not lose anyone
It would be appreciated if any handouts or other reading materials could be communicated at least 24 hours in advance.	This will be done for future courses.
Pace was a bit slow but good content and interesting seminar	Understood. See first comment.
